# **2024 CALVING GUIDE**

Spring calving is here! Stock up on the products you and your herd need for a successful calving season. FBN<sup>®</sup> carries a broad selection of cattle health essentials. Check out this popular products list for some helpful reminders.

#### **Disease Prevention**

Scours and respiratory diseases can severely impact calf survival rates and productivity. Disinfectants can help control contamination and transmission of common pathogens. Your best defenses against infection are quick access to good colostrum and vaccines for your cows and calves.

#### **Pharmaceuticals**

Stock up on electrolytes and antibiotics for calf scours. Vitamin and mineral supplements can help cows stay healthy before and after calving.

#### **Nutrition**

Providing adequate nutrition pre-calving can impact the difficulty of delivery, the production of colostrum, the cow's recovery and ability to rebreed, and ultimately the new calf's ability to fight disease and perform.

#### **Facilities**

Thoroughly clean facilities and stock up on necessary equipment (recommendations on the next page).

Note: This is not a protocol recommendation. Please consult a Veterinarian before making any treatment decisions. ALWAYS READ AND FOLLOW LABEL DIRECTIONS.
