OUR MISSION

POWERING THE PROSPERITY OF FAMILY FARMERS AROUND THE WORLD

To be a farmer is to live in a highly unpredictable world, where even unrelenting hard work doesn't guarantee success. Which is why *FBN*® is on a mission to provide our farmer members more control every day, in every decision that affects their livelihood.

Since 2014, *FBN* has been building an online platform that helps put family farmers in the driver's seat. Through better use of data and technology, we are redefining value and convenience to help farmers make confident decisions that reduce costs and maximize revenue potential.

HIGH QUALITY, TRUSTED PRODUCTS AT A GREAT PRICE

FBN offers a wide range of quality herbicide, insecticide, fungicide, adjuvant and nutrition solutions that help farmers effectively protect and nourish their crops. We carry generic alternatives to many of the latest crop protection brands, plus a line of adjuvant and crop nutrition solutions uniquely selected to address the growing demands of crop production.

At *FBN.com*, farmers can also explore *FBN's* comprehensive list of seed, livestock products, and farm and ranch supplies. The platform provides farmers with access to transparent list prices and flexible payment options.

FBN PRODUCT LINES

FARMERS FIRST™

The Farmers First™ brand of adjuvants, crop nutrition, seed treatment, cover crops, liquid feed and mineral offer farmers a broad portfolio of unique, quality products that will be a farmer's first choice to power the performance of their crop protection and nutrition programs.

WILLOWOOD USA 🇺🇸

The Willowood USA line of crop protection products includes a wide range of generic alternatives to many crop protection brands, including non-selective and selective herbicides, insecticides and fungicide products.

FBN CROP PROTECTION GENERIC ALTERNATIVES

BRAND NAME	COMMON ACTIVE INGREDIENT	FBN PRODUCT
<div><div></div>2,4-D LV6</div>	2,4-D, 2-ethylhexyl ester (5.50)	GCS 2,4-D LV 6 Ester
<div><div></div>AAtrex® 4L</div>	Atrazine (4.00)	GCS Atrazine 4L¹
<div><div></div>Abolish® 8 EC</div>	Thiobencarb (8.00)	Willowood Thioben 8EC
<div><div></div>Admire® Pro</div>	Imidacloprid (4.00)	Willowood Imidacloprid 4SC
<div><div></div>Affinity® BroadSpec</div>	Thifensulfuron (25.00%) + Tribenuron-methyl (25.00%)	Trifensulfruon 25% + Tribenuron-methyl 25% Value Pick
<div><div></div>Affinity® Tank Mix</div>	Thifensulfuron (40.00%) + Tribenuron-methyl (10.00%)	Trifensulfruon 40% + Tribenuron-methyl 10% Value Pick
<div><div></div>AFrame™</div>	Azoxystrobin (2.08)	GCS Azoxy 2SC
<div><div></div>Agri Star® Ozone 3.0</div>	Flucarbazone-sodium (1.75)	Vasuvius™
<div><div></div>Agri-Mek® SC</div>	Abamectin (0.70)	Willowood Abamectin 0.7SC¹
<div><div></div>Aim® EC</div>	Carfentrazone-ethyl (2.00)	Locksley™
<div><div></div>Anthem® MAXX</div>	Fluthiacet-methyl (0.13) + Pyroxasulfone (4.17)	Anthem® Maxx
<div><div></div>Armezon®</div>	Topramezone (2.80)	Impact®
<div><div></div>Assure® II</div>	Quizalofop-p-ethyl (0.88)	Se-Cure EC
<div><div></div>Authority® Assist</div>	Imazethapyr (0.67) + Sulfentrazone (3.33)	Willowood Sulfen Imaz
<div><div></div>Authority® MTZ</div>	Metribuzin (27.00%) + Sulfentrazone (18.00%)	Willowood Sulfen Met
<div><div></div>Banvel®</div>	Dicamba DMA (4.00)	Dicamba DMA 4 Value Pick
<div><div></div>Basagran®</div>	Bentazon (4.00)	BashAzon
<div><div></div>Bravo Weather Stik®</div>	Chlorothalonil (6.00)	Chlorothalonil 6.0lb Value Pick
<div><div></div>Brigade® 2EC</div>	Bifenthrin (2.00)	GCS Bifenthrin 2EC¹
<div><div></div>Buccaneer® 5 Extra</div>	Glyphosate, N-(phosphonomethyl) glycine in the form of its isopropylamine salt	Willowood Glypho 5
<div><div></div>Callisto®</div>	Mesotrione (4.00)	Willowood Mesotrione 4SC
<div><div></div>Capture® LFR®</div>	Bifenthrin (1.50)	GCS Bifenthrin LFC¹
<div><div></div>Clarity®</div>	Dicamba DGA (4.00)	Dicamba DGA 4 Value Pick
<div><div></div>Cobra®</div>	Lactofen (2.00)	Willowood Lactofen 2EC
<div><div></div>Command® 3ME</div>	Clomazone (3.00)	Willowood Clomazone 3ME
<div><div></div>Daze® 4SC</div>	Thidiazuron (4.00)	Maxunitech TDZ 4SC
<div><div></div>Defy® Amine 4</div>	2,4-D, dimethylamine salt (3.80)	Alligare 2,4-D Amine
<div><div></div>Delaro® 325 SC</div>	Prothioconazole + Trifloxystrobin	Prothioconazole (1.46) + Trifloxystrobin (1.25) Value Pick
<div><div></div>Direx® 4L</div>	Diuron (4.00)	Alligare Diuron 4L
<div><div></div>Dual II Magnum®</div>	S-metolachlor (7.64)	GCS S-Metolachlor 82.4% EC
<div><div></div>Enlist One®</div>	2,4-D, choline salt (3.80)	Enlist One®
<div><div></div>Facet® L</div>	Quinclorac (4.02)	Prize
<div><div></div>FirstRate®</div>	Cloransulam-methyl (84.00%)	Willowood Cloran DF
<div><div></div>Gramoxone® SL 3.0</div>	Paraquat Dichloride (3.00)	Willowood Paraquat 3SL¹
<div><div></div>Grazon® P+D</div>	2,4-D, triisopropanolamine salt (2.00) + Picloram, triisopropanolamine salt (0.54)	Gunslinger® P+D¹
<div><div></div>GrazonNext® HL</div>	2,4-D, dimethylamine salt (3.33) + Aminopyralid, Triisopropanolammonium salt (0.41)	Gunslinger® AMP¹
<div><div></div>Harness®</div>	Acetochlor EC (7.00)	Arrest Plus
<div><div></div>Liberty®</div>	Glufosinate-ammonium (2.34)	Willowood Glufosinate 280SL
<div><div></div>Mepex®</div>	Mepiquat Chloride (0.35)	Mep® 42
<div><div></div>Nortron® SC</div>	Ethofumesate (4.00)	Willowood Ethofumesate 4SC
<div><div></div>Onager®</div>	Hexythiazox (1.00)	Hexy 1E
<div><div></div>Onset® 3.6L</div>	Tebuconazole (3.60)	Willowood Teb 3.6SC

BRAND NAME	COMMON ACTIVE INGREDIENT	FBN PRODUCT
<div><div></div>Orthene® 97</div>	Acephate (97.00%)	Acephate 97.00% Value Pick
<div><div></div>Proline® 480 SC</div>	Prothioconazole (4.0)	Prothioconazole (4.0) Value Pick
<div><div></div>Priaxor® Xemium® Brand Fungicide</div>	Fluxapyroxad (1.39) + Pyraclostrobin (2.78)	Priaxor® Xemium® Brand Fungicide
<div><div></div>Prowl® H20</div>	Pendimethalin (3.80)	Pendimethalin 3.80 Value Pick
<div><div></div>Pursuit®</div>	Imazethapyr (2.00)	Willowood Imazethapyr 2SL
<div><div></div>Quali-Pro® Abamectin 0.15 EC</div>	Abamectin (0.15)	Willowood Abamectin 0.15LV1
<div><div></div>Quilt Xcel®</div>	Azoxystrobin (1.18) + Propiconazole (1.02)	GCS AzoxyProp
<div><div></div>Raptor®</div>	Imazamox	Imazamox 1.00 Value Pick
<div><div></div>Rhonox®</div>	MCPA, 2-ethylhexyl ester (3.70)	MCPA, 2-ethylhexyl ester 3.70 Value Pick (2/2.5)
<div><div></div>RiceBeaux®</div>	Propanil (3.00) + Thiobencarb (3.00)	Willowood Thionil EC
<div><div></div>RiceShot®</div>	Propanil EC (4.00)	Willowood Propanil EC
<div><div></div>Roundup PowerMAX®</div>	Glyphosate, N-(phosphonomethyl) glycine, in the form of its potassium salt	Willowood Glypho 6
<div><div></div>Sandea®</div>	Halosulfuron-methyl (75.00%)	Halosulfuron-methyl (75.00%) Value Pick
<div><div></div>Select® 2EC</div>	Clethodim (2.00)	Willowood Clethodim 2EC
<div><div></div>Sencor®</div>	Metribuzin (75.00%)	Willowood Metribuzin 75DF
<div><div></div>Sepoy</div>	Spiromesifen (2.05)	Spiromesifen (2.05) Value Pick
<div><div></div>Sharpen® Powered by Kixor® Herbicide</div>	Saflufenacil (2.85)	Sharpen® Powered by Kixor® Herbicide
<div><div></div>Silencer®</div>	Lambda-cyhalothrin (1.00)	Willowood Lambda-Cy 1EC¹
<div><div></div>Spartan® 4F</div>	Sulfentrazone (4.00)	Willowood Sulfen 4SC
<div><div></div>Stalwart® 3W</div>	Atrazine (1.66) + Mesotrione (0.22) + Metolachlor (1.70)	GCS MesoXtra¹
<div><div></div>StareDown™</div>	Fluroxypyr 1-methylheptyl ester (1.60)	Fancy
<div><div></div>Status®</div>	Dicamba, sodium salt (44.00%) + Diflufenzopyr-sodium (17.10%)	Status®
<div><div></div>Stinger®</div>	Clopyralid, monoethanolamine salt (3.00)	Bite
<div><div></div>Super Boll®</div>	Ethephon (6.00)	Ethephon Value Pick
<div><div></div>SuperWHAM!®</div>	Propanil (4.00)	Willowood Propanil 4SC
<div><div></div>SureStart® II</div>	Acetochlor (3.75) + Clopyralid, Monoethanolamine salt (0.29) + Flumetsulam (0.12)	Aceto 3.75 + Clopyralid + Flumet .12 Value Pick
<div><div></div>TebuStar® 45 WSP</div>	Tebuconazole (45.00%)	Willowood Teb 45DF
<div><div></div>Tilt®</div>	Propiconazole (3.60)	Willowood Propicon 3.6EC
<div><div></div>Topsin® 4.5FL</div>	Thiophanate-methyl (4.50)	Thiophanate-methyl 4.50 Value Pick
<div><div></div>Triumph® 22K</div>	Picloram, potassium salt (2.00)	Alligare Triumph® 22K¹
<div><div></div>Trivapro®</div>	Azoxystrobin (0.92) + Benzovindiflupyr (0.25) + Propiconazole (1.04)	Trivapro®
<div><div></div>Valor® EX Herbicide</div>	Flumioxazin (4.00)	Flumioxazin 44% SC (Redeagle)
<div><div></div>WeedMaster®</div>	2,4-D, dimethylamine salt (2.87) + Dicamba DMA (1.00)	Grassmaster™
<div><div></div>WideMatch®</div>	Clopyralid, monoethanolamine salt (0.75) + Fluroxypyr 1-methylheptyl ester (0.75)	Far Reach
<div><div></div>Zeal®</div>	Etoxazole (2.88)	Suremite™ SC
<div><div></div>Zidua® SC</div>	Pyroxasulfone (4.17)	Zidua® SC

DISCOVER DIRECT-TO-FARM DELIVERY ON YOUR TERMS

**DELIVERY
IN 3-DAYS
OR LESS***

Get delivery in 3 days or less on most orders during the growing season. Our Delivery Transparency feature shows you estimated delivery dates before you buy. You can choose delivery options suited to your schedule and always stay informed with timely delivery alerts and updates.

WE'RE CLOSER THAN YOU THINK

When you choose *FBN*, you work closely with our network of Community Builders—independent sales representatives who sell products and services designed to give family farmers personal service. Combined with a world-class logistics network, *FBN* gives U.S. farmers the competitive advantages they need to succeed.

CONVENIENT LOCAL ACCESS

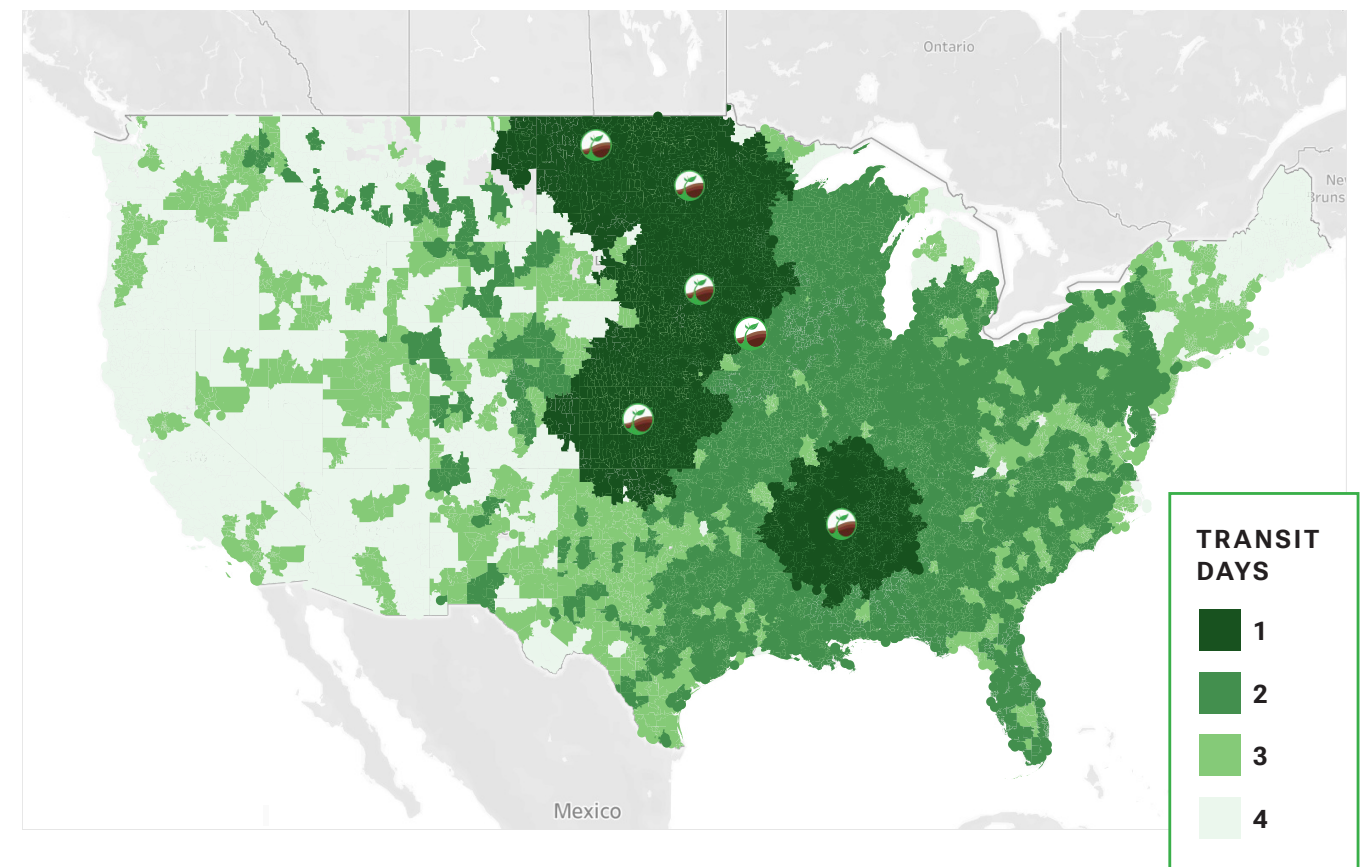

Our *FBN* Access Points build on the services offered at our Warehouses. Both provide a local presence for your *FBN* purchases, with Access Points specifically enhancing our network to bring in-season pickup, returns and warehouse services even closer to more of our members. It's all about giving you convenient options and bringing *FBN* support closer to your farm.

* on most orders.

FBN PLANNING TOOLS

Stay organized, save time and build a plan for a successful season.

FBN Shopping Lists allow you to build, save and share lists of products from our online store. You can even see products you purchased in previous seasons.

New customer? No problem! Upload an Invoice, and we'll build a Shopping List for you that translates the branded products into trusted *FBN* Generics from our store and calculate potential price savings from *FBN* compared to what you paid.

Visit fbn.com/direct/shopping-lists today to build your Shopping List.

Upload a non-FBN invoice at fbn.com/direct/upload-invoice

AcrePlan™ is the only digital chem planning and purchasing tool in agriculture. Use the step-by-step workflow developed by *FBN* Agronomists to build a comprehensive tank mix for each pass across the field for your crop. AcrePlan makes planning and ordering easier than ever before. With just a few clicks, you can complete your chem program with confidence.

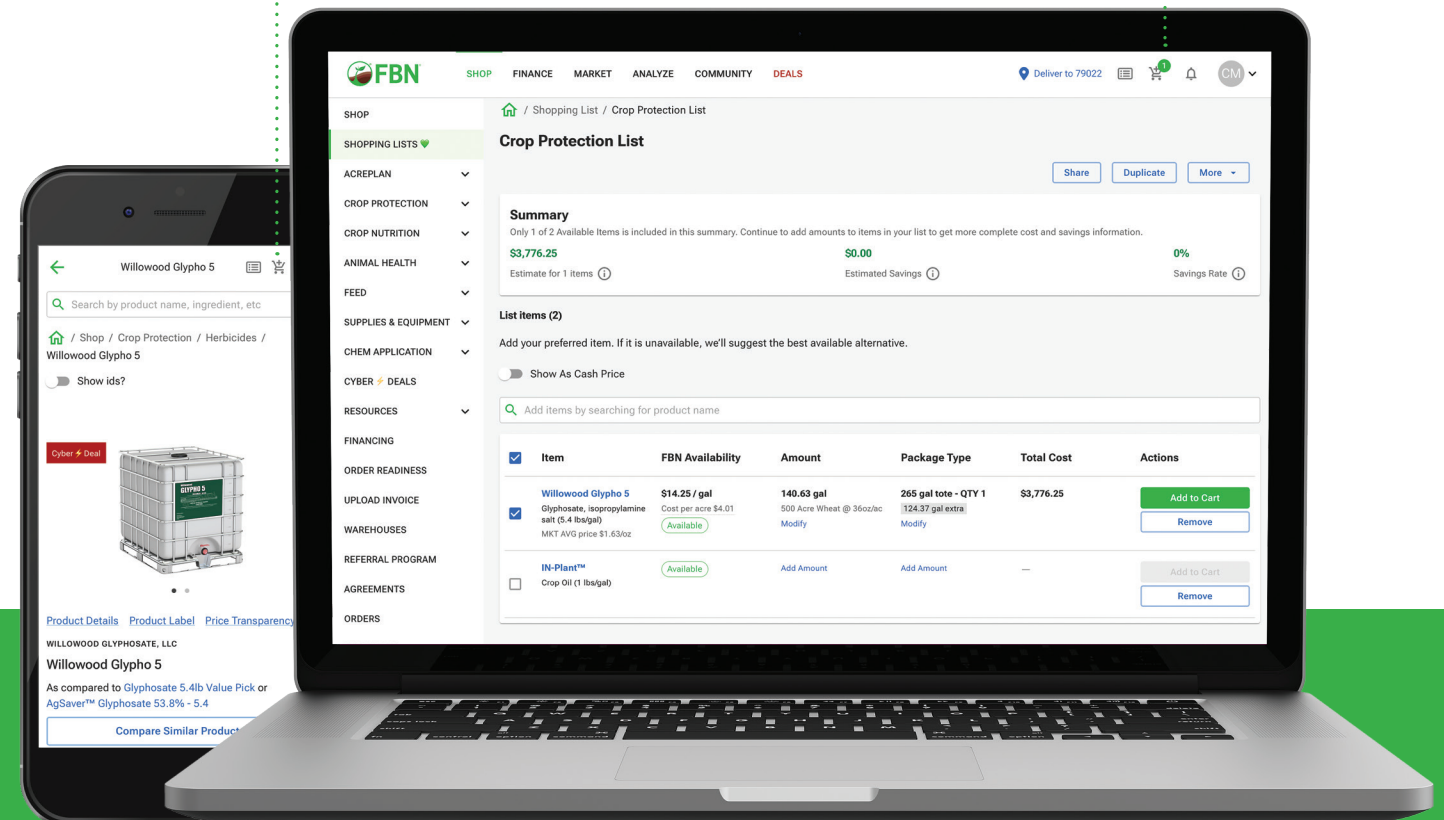

Learn more at fbn.com/acreplan and build your ag chem plan today.

AcrePack™ features agronomist-curated product packs tailored to specific crops, regions, and application timings. Whether you are trying a new crop or program, these packs are 100% customizable to streamline your planning and ordering.

Learn more at fbn.com/acrepack and see available product packs.

CORN

HERBICIDES

Willowood Glypho 5

Post-emergent, non-selective herbicide offering broad spectrum control of many annual weeds in many agricultural systems and glyphosate-resistant crops. Formulated as a water-soluble liquid. Contains glyphosate, the active ingredient found in Buccaneer® 5 Extra Herbicide.

Willowood Glypho 6

A group 9 post-emergent, non-selective herbicide for weed control in many agricultural systems and in Glyphosate-resistant crops. Formulated with potassium salt, which provides better rainfastness and improved performance under adverse conditions. It is also approved to be used in tank mixes with Enlist One®.

Willowood Glufosinate 280SL

Post-emergent, non-selective herbicide for Post-emergent broadcast use on canola, corn, cotton and soybean designated as LibertyLink® or glufosinate tolerant. Contains glufosinate, the active ingredient in Liberty® Herbicide.

GCS Atrazine 4L¹

Pre-emergent and post-emergent herbicide that controls many annual broadleaf weeds and grasses in corn, sorghum, sugarcane and other labeled crops. Contains atrazine, the active ingredient found in Aatrex® 4L Herbicide.

GCS Acetochlor 7EC

Pre- and post-emergent encapsulated herbicide for weed control in field corn, production seed corn, cotton, peanuts, forage or grain sorghum (Milo), soybeans and sugar beets. Contains acetochlor, the active ingredient in Warrant® Herbicide.

Willowood Mesotrione 4SC

Pre- and post-emergent herbicide for control of annual broadleaf weeds in corn and other labeled crops. Contains mesotrione, the active ingredient in Callisto® Herbicide.

GCS MesoXtra

Pre- and post-emergent herbicide for control of broadleaf weeds and grasses in corn and grain sorghum. Contains metolachlor, mesotrione and atrazine, the active ingredients in Stalwart® 3W Herbicide.

Status®

Post-emergent broad spectrum corn herbicide, in a safened formulation, specifically designed for use alone or with glyphosate combinations.

Dicamba DGA 4 Value Pick

Pre- and post-emergent herbicide for weed control in corn, soybeans, cotton, fallow, general farmstead (non-cropland), sorghum, grass grown for seed, hay, pasture, rangeland, small grains and other labeled crops. Contains dicamba DGA, the active ingredient in Clarity® Herbicide.

Impact®

Post-emergent systemic herbicide for control of emerged weeds in all types of field corn, seed corn, popcorn, and sweet corn, and weed control between crops.

GCS 2,4-D LV 6 Ester

Pre- and post-emergent herbicide for control of many broadleaf weeds and brush control in corn, small grains, soybeans (preplant) and other labeled crops. Contains 2,4-D and 2-ethylhexyl ester, the active ingredients found in 2,4-D LV 6 Herbicide.

Willowood Paraquat 3SL¹

Defoliant and desiccant herbicide for the control of weeds and grasses and as a harvest aid. Contains paraquat, the active ingredient in Gramoxone® SL 3.0 Herbicide.

Sharpen® powered by Kixor® Herbicide

Contact burndown and rate-dependent residual pre-emergent broadleaf weed control in select field and row crops such as corn, cotton, forage grasses, rice, small grains, sorghum, soybean, fallow and postharvest croplands, pasture and other labeled crops.

Dicamba DMA 4 Value Pick

Pre- and post-emergent herbicide for weed control in corn, cotton, sorghum, soybean, small grains, pasture, hay, rangeland, farmstead (non-cropland), fallow and other labeled crops. Contains dicamba DMA, the active ingredient in Banvel® Herbicide.

FUNGICIDES

GCS AzoxyProp

Broad spectrum fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin and propiconazole, the active ingredients in Quilt Xcel® Fungicide.

GCS Azoxy 2 SC

Broad spectrum systemic fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin, the active ingredient in Aframe™ Fungicide.

Willowood Propicon 3.6EC

Broad spectrum fungicide formulated for the management of many plant diseases in labeled row and specialty crops. Contains propiconazole, the active ingredient in Tilt® Fungicide.

Prothioconazole (1.46) + Trifloxystrobin (1.25) Value Pick

A dual mode of action fungicide offering broad-spectrum and residual disease control and plant health benefits for corn, soybeans, wheat and other crops. Suppresses and controls tar spot, rusts, white mold and more. Contains the same active ingredients as Delaro® 325 SC Fungicide.

INSECTICIDES

Willowood Lambda-Cy 1EC¹

Broad spectrum insecticide for use in many labeled row and specialty crops. Can be applied via ground or air. Restricted Use Pesticide. Contains lambda-cyhalothrin, the active ingredient in Silencer® Insecticide.

GCS Bifenthrin 2EC¹

Broad spectrum insecticide for control of insects and mites in many row and specialty crops, such as canola, corn, cotton, dried beans and peas, fruiting vegetables, grapes, head lettuce, peanuts, soybeans and other labeled crops. Contains bifenthrin, the active ingredient in Bifen 2EC Select™ Insecticide.

GCS Bifenthrin LFC¹

Soil insecticide for control of labeled soil insect pests. Formulated so that it can be mixed directly with water. Contains bifenthrin, the active ingredient in Brigade® 2EC Insecticide.

Suremite SC

Long lasting miticide for use in cotton, field corn, soybeans and other labeled crops to control spider mites and other mite species at any life stage.

Datsun

Group 3A Insecticide for control of cutworm, armyworm, stalk borer and other labeled insects.

ADJUVANTS

Sizzle®

Advanced oil-based water conditioner, activator, drift and deposition aid that provides faster observable results to ensure confidence in glyphosate performance at half the rate of competitive products.

FieldGrip™ DRA

FieldGrip DRA is a high-concentrate emulsifiable deposition aid and drift management adjuvant.

Even™ 34L

Even 34L is a liquid ammonium sulfate (AMS) water conditioner designed to reduce the antagonism of spray water impurities that can interfere with the performance of glyphosate, glufosinate and other herbicides.

Even™ L Pro

Even L Pro is an optimized premix of drift management agents, deposition aids, AMS and surfactant. It is designed to enhance the performance and activity of pesticide sprays by reducing tie-up of herbicides in hard water, improving spray application coverage and minimizing spray drift.

IN-Zorb™ ADV

IN-Zorb ADV is an APE-free nonionic surfactant designed to improve the effectiveness of crop protection products by reducing surface tension of spray droplets for uniform spreading and coverage of leaf surfaces.

IN-Cert™ MSO

IN-Cert MSO is a methylated vegetable oil and surfactant blend formulated to enhance pesticide performance through improved leaf cuticle penetration and uniform droplet coverage of target surfaces.

IN-Cert™ Organosil MSO

IN-Cert Organosil MSO is a multifunction adjuvant that rapidly penetrates leaf surfaces and provides superior surface coverage compared to ordinary silicone blends, MSO or crop oil.

IN-Plant™

Crop oil concentrate adjuvant containing paraffinic oil, emulsifiers and surfactants.

IN-Plant™ ADV

IN-Plant ADV is a unique hybrid adjuvant that combines the functions of a nonionic surfactant, oil concentrate and penetrant in a single product. It may be used as a replacement for crop oil concentrates and high surfactant oil concentrates.

Tether™ 24

Tether 24 is a multifunction adjuvant that reduces drift risk and protects 2,4-D, glyphosate and other herbicides from hard water tie-up.

CORN

HERBICIDES

Willowood Glypho 5

Post-emergent, non-selective herbicide offering broad spectrum control of many annual weeds in many agricultural systems and glyphosate-resistant crops. Formulated as a water-soluble liquid. Contains glyphosate, the active ingredient found in Buccaneer® 5 Extra Herbicide.

Willowood Glypho 6

A group 9 post-emergent, non-selective herbicide for weed control in many agricultural systems and in Glyphosate-resistant crops. Formulated with potassium salt, which provides better rainfastness and improved performance under adverse conditions. It is also approved to be used in tank mixes with Enlist One®.

Willowood Glufosinate 280SL

Post-emergent, non-selective herbicide for post-emergent broadcast use on canola, corn, cotton and soybean designated as LibertyLink® or glufosinate tolerant. Contains glufosinate, the active ingredient in Liberty® Herbicide.

Pendimethalin 3.80 Value Pick

Selective herbicide for control of certain broadleaf weeds and annual grasses. Contains pendimethalin, the active ingredient pendimethalin, the active ingredient in Prowl® H2O Herbicide.

Se-Cure EC

Selective herbicide for the control of annual and perennial grasses in many labeled crops. Contains quizalofop-p-ethyl, the active ingredient in Se-Cure EC Herbicide.

Willowood Clethodim 2EC

Post-emergent herbicide for control of grasses in many labeled row and specialty crops. Contains clethodim, the active ingredient in Select® 2EC Herbicide.

GCS S-Metolachlor 82.4% EC

Pre-plant, pre-emergent or post-emergent herbicide for control of small-seeded broadleaf weeds and grasses in labeled crops, such as corn, cotton and soybeans. Contains s-metolachlor, the active ingredient in Dual II Magnum® Herbicide.

Enlist One®

Pre-plant, pre-emergent and post-emergent herbicide for control of emerged annual and perennial broadleaf weeds in Enlist corn, soybeans and cotton. Enlist herbicides with Colex-D® technology are the ONLY 2,4-D containing products authorized and specifically labeled for use with Enlist crops.

GCS 2,4-D LV 6 Ester

Pre- and post-emergent herbicide for control of many broadleaf weeds and brush control in corn, small grains, soybeans (preplant) and other labeled crops. Contains 2,4-D and 2-ethylhexyl ester, the active ingredients found in 2,4-D LV 6 Herbicide.

Willowood Paraquat 3SL¹

Defoliant and desiccant herbicide for the control of weeds and grasses and as a harvest aid. Contains paraquat, the active ingredient in Gramaxone® SL Herbicide.

Sharpen® powered by Kixor® Herbicide

Contact burndown and rate-dependent residual pre-emergent broadleaf weed control in select field and row crops such as corn, cotton, forage grasses, rice, small grains, sorghum, soybean, fallow and postharvest croplands, pasture and other labeled crops.

Dicamba DMA 4 Value Pick

Pre- and post-emergent herbicide for weed control in corn, cotton, sorghum, soybean, small grains, pasture, hay, rangeland, farmstead (non-cropland), fallow and other labeled crops. Contains dicamba DMA, the active ingredient in Banvel® Herbicide.

Locksley™

Selective post-emergent control of kochia, waterhemp, lambsquarters and other broadleaf weeds in emulsifiable concentrate formulation.

DESICCANTS, PGRs, DEFOLIANTS

Ethephon 6 lb Value Pick

Plant growth regulator for agricultural use on cotton and tobacco. Contains ethephon, the active ingredient in Super Boll®.

Mepiquat Chloride (0.35) Value Pick

Plant growth regulator for agricultural use in cotton. Contains mepiquat chloride, the active ingredient in Mepex® PGR.

Thidiazuron 4 Value Pick

Cotton defoliant. Contains thidiazuron, the active ingredient in Klean®-Pik 500 SC.

FUNGICIDES

GCS Azoxystrobin

Broad spectrum fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin and propiconazole, the active ingredients in Quilt Xcel® Fungicide.

GCS Azoxystrobin 2 SC

Broad spectrum systemic fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin, the active ingredient in Aframe™ Fungicide.

Willowood Propicon 3.6EC

Broad spectrum fungicide formulated for the management of many plant diseases in labeled row and specialty crops. Contains propiconazole, the active ingredient in Tilt® Fungicide.

Willowood Teb 3.6SC

Fungicide for the control of specified diseases in row and specialty crops such as barley, beans, corn, cotton, peanut, soybean, wheat and other labeled crops. Contains tebuconazole, the same active ingredient in Onset™ 3.6SL Fungicide.

Prothioconazole (4.0) Value Pick

A broad-spectrum fungicide for wheat, sugarbeet, peanut, cotton and other crops. Suppresses and controls Cercospora leaf spot, powdery mildew, head blight and other yield-limiting diseases. Contains the same active ingredient as Proline® 480 SC Fungicide.

INSECTICIDES

Acephate 97.00% Value Pick

Water-soluble insecticide for use in many labeled agricultural crops. Contains acephate, the active ingredient in Orthene® 97 Insecticide.

Willowood Lambda-Cy 1EC¹

Broad spectrum insecticide for use in many labeled row and specialty crops. Can be applied via ground or air. Restricted Use Pesticide. Contains lambda-cyhalothrin, the active ingredient in Silencer® Insecticide.

GCS Bifenthrin 2EC¹

Broad spectrum insecticide for control of insects and mites in many row and specialty crops, such as canola, corn, cotton, dried beans and peas, fruiting vegetables, grapes, head lettuce, peanuts, soybeans and other labeled crops. Contains bifenthrin, the active ingredient in Bifen 2EC Select™ Insecticide.

Willowood Abamectin 0.7SC¹

Insecticide/miticide for control of mites, leafminers, thrips and other labeled insects. Contains abamectin, the active ingredient in Agri-Mek® SC Insecticide.

Willowood Imidacloprid 4SC

For uses in pest management, control of listed insects that may vector diseases and maintenance of plant health. Contains imidacloprid, the active ingredient in Admire® Pro Systemic Protectant.

Spiromesifen (2.05) Value Pick

Group 23 Insecticide/Miticide for control of Spider Mites and grass mites in corn and other labeled crops.

Suremite™ SC

Long lasting miticide for use in Cotton, Field Corn, Soybeans and other labeled crops to control Spider Mites and other mite species at any life stage.

ADJUVANTS

Sizzle®

Farmers First™ Sizzle® is an advanced oil-based water conditioner, activator, drift & deposition aid that provides faster observable results to ensure confidence in glyphosate performance at half the rate of competitive products.

FieldGrip™ DRA

FieldGrip DRA is a high-concentrate emulsifiable deposition aid and drift management adjuvant.

Even™ 34L

Even 34L is a liquid ammonium sulfate (AMS) water conditioner designed to reduce the antagonism of spray water impurities that can interfere with the performance of glyphosate, glufosinate and other herbicides.

Even™ L Pro

Even L Pro is an optimized premix of drift management agents, deposition aids, AMS and surfactant. It is designed to enhance the performance and activity of pesticide sprays by reducing tie-up of herbicides in hard water, improving spray application coverage and minimizing spray drift.

Even™ DR

Even DR is a water soluble blend of reduced rate water conditioning and sequestering agents. It is intended for use with glyphosate and other herbicide spray applications that recommend the use of ammonium sulfate or nitrogen fertilizer as a spray additive. Even DR is a fully soluble spray-grade granule that readily goes into solution.

IN-Zorb™ ADV

IN-Zorb ADV is an APE-free nonionic surfactant designed to improve the effectiveness of crop protection products by reducing surface tension of spray droplets for uniform spreading and coverage of leaf surfaces.

IN-Cert™ MSO

IN-Cert MSO is a methylated vegetable oil and surfactant blend formulated to enhance pesticide performance through improved leaf cuticle penetration and uniform droplet coverage of target surfaces.

IN-Cert™ HighSurf MSO

IN-Cert HighSurf MSO is a specialized blend of modified seed oil and surfactant designed to enhance the performance of herbicides. It may be used at reduced rates compared to conventional MSO. IN-Cert HighSurf MSO may also be used with insecticides, fungicides and PGRs.

IN-Cert™ Organosil MSO

IN-Cert Organosil MSO is a multifunction adjuvant that rapidly penetrates leaf surfaces and provides superior surface coverage compared to ordinary silicone blends, MSO or crop oil.

IN-Plant™

Crop oil concentrate adjuvant containing paraffinic oil, emulsifiers and surfactants.

Tether™ 24

Tether 24 is a multifunction adjuvant that reduces drift risk and protects 2,4-D, glyphosate and other herbicides from hard water tie-up.

RICE

HERBICIDES

Willowood Glypho 5

Post-emergent, non-selective herbicide offering broad spectrum control of many annual weeds in many agricultural systems and glyphosate-resistant crops. Formulated as a water-soluble liquid. Contains glyphosate, the active ingredient found in Buccaneer® 5 Extra Herbicide.

Willowood Glypho 6

A group 9 post-emergent, non-selective herbicide for weed control in many agricultural systems and in Glyphosate-resistant crops. Formulated with potassium salt, which provides better rainfastness and improved performance under adverse conditions. It is also approved to be used in tank mixes with Enlist One®.

Willowood Clomazone 3ME

Pre-emergent herbicide for control of annual grasses in dry-seeded rice. Contains Clomazone, the active ingredient in Command® 3ME Herbicide.

Willowood Propanil EC

Selective post-emergent herbicide for control of weeds in rice only labeled Southern states. Contains propanil, the active ingredient in Riceshot® Herbicide.

Willowood Propanil 4SC

Selective post-emergent herbicide for control of weeds in rice only labeled Southern states. Contains propanil, the active ingredient in SuperWHAM!® Herbicide.

Willowood Thioben 8EC

Residual herbicide for control of labeled weeds in rice (excluding California). Contains thiobencarb, the active ingredient in Abolish® 8EC Herbicide.

Prize

Herbicide for control of weeds in dry-seeded and water-seeded rice. Contains quinclorac, the active ingredient in Facet® L Herbicide.

Willowood Clethodim 2EC

Post-emergent herbicide for control of grasses in many labeled row and specialty crops. Contains clethodim, the active ingredient in Select® 2EC Herbicide.

Pendimethalin 3.80 Value Pick

Selective herbicide for control of certain broadleaf weeds and annual grasses. Contains pendimethalin, the active ingredient pendimethalin, the active ingredient in Prowl® H2O Herbicide.

GCS 2,4-D LV 6 Ester

Pre- and post-emergent herbicide for control of many broadleaf weeds and brush control in corn, small grains, soybeans (preplant) and other labeled crops. Contains 2,4-D and 2-ethylhexyl ester, the active ingredients found in 2,4-D LV 6 Herbicide.

Willowood Paraquat 3SL¹

Defoliant and desiccant herbicide for the control of weeds and grasses and as a harvest aid. Contains paraquat, the active ingredient in Gramaxone® SL Herbicide.

Sharpen® powered by Kixor® Herbicide

Contact burndown and rate-dependent residual pre-emergent broadleaf weed control in select field and row crops such as corn, cotton, forage grasses, rice, small grains, sorghum, soybean, fallow and postharvest croplands, pasture and other labeled crops.

Dicamba DMA 4 Value Pick

Pre- and post-emergent herbicide for weed control in corn, cotton, sorghum, soybean, small grains, pasture, hay, rangeland, farmstead (non-cropland), fallow and other labeled crops. Contains dicamba DMA, the active ingredient in Banvel® Herbicide.

FUNGICIDES

GCS Azoxystrobin

Broad spectrum fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin and propiconazole, the active ingredients in Quilt Xcel® Fungicide.

GCS Azoxystrobin 2 SC

Broad spectrum systemic fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin, the active ingredient in Aframe™ Fungicide.

Willowood Propicon 3.6EC

Broad spectrum fungicide formulated for the management of many plant diseases in labeled row and specialty crops. Contains propiconazole, the active ingredient in Tilt® Fungicide.

INSECTICIDES

Willowood Lambda-Cy 1EC¹

Broad spectrum insecticide for use in many labeled row and specialty crops. Can be applied via ground or air. Restricted Use Pesticide. Contains lambda-cyhalothrin, the active ingredient in Silencer® Insecticide.

ADJUVANTS

Sizzle®

Farmers First™ Sizzle® is an advanced oil-based water conditioner, activator, drift & deposition aid that provides faster observable results to ensure confidence in glyphosate performance at half the rate of competitive products, concentrates and high surfactant oil concentrates.

FieldGrip™ DRA

FieldGrip DRA is a high-concentrate emulsifiable deposition aid and drift management adjuvant.

Even™ 34L

Even 34L is a liquid ammonium sulfate (AMS) water conditioner designed to reduce the antagonism of spray water impurities that can interfere with the performance of glyphosate, glufosinate and other herbicides.

Even™ DR

Even DR is a water soluble blend of reduced rate water conditioning and sequestering agents. Even L Pro is an optimized premix of drift management agents, deposition aids, AMS and surfactant. It is designed to enhance the performance and activity of pesticide sprays by reducing tie-up of herbicides in hard water, improving spray application coverage and minimizing spray drift.

IN-Zorb™ ADV

IN-Zorb ADV is an APE-free nonionic surfactant designed to improve the effectiveness of crop protection products by reducing surface tension of spray droplets for uniform spreading and coverage of leaf surfaces.

IN-Cert™ MSO

IN-Cert MSO is a methylated vegetable oil and surfactant blend formulated to enhance pesticide performance through improved leaf cuticle penetration and uniform droplet coverage of target surfaces.

IN-Cert™ HighSurf MSO

IN-Cert HighSurf MSO is a specialized blend of modified seed oil and surfactant designed to enhance the performance of herbicides. It may be used at reduced rates compared to conventional MSO. IN-Cert HighSurf MSO may also be used with insecticides, fungicides and PGRs.

IN-Cert™ Organosil MSO

IN-Cert Organosil MSO is a multifunction adjuvant that rapidly penetrates leaf surfaces and provides superior surface coverage compared to ordinary silicone blends, MSO or crop oil.

IN-Plant™

Crop oil concentrate adjuvant containing paraffinic oil, emulsifiers and surfactants.

IN-Plant™ ADV

IN-Plant ADV is a unique hybrid adjuvant that combines the functions of a nonionic surfactant, oil concentrate and penetrant in a single product. It may be used as a replacement for crop oil.

Tether™ 24

Tether 24 is a multifunction adjuvant that reduces drift risk and protects 2,4-D, glyphosate and other herbicides from hard water tie-up.

RICE

SOYBEANS

HERBICIDES

Willowood Glypho 5

Post-emergent, non-selective herbicide offering broad spectrum control of many annual weeds in many agricultural systems and glyphosate-resistant crops. Formulated as a water-soluble liquid. Contains glyphosate, the active ingredient found in Buccaneer® 5 Extra Herbicide.

Willowood Glypho 6

A group 9 post-emergent, non-selective herbicide for weed control in many agricultural systems and in Glyphosate-resistant crops. Formulated with potassium salt, which provides better rainfastness and improved performance under adverse conditions. It is also approved to be used in tank mixes with Enlist One®.

Willowood Glufosinate 280SL

Post-emergent, non-selective herbicide for post-emergent broadcast use on canola, corn, cotton and soybean designated as LibertyLink® or glufosinate tolerant. Contains glufosinate, the active ingredient in Liberty® Herbicide.

Willowood Sulfen 4SC

Pre-emergent, soil-applied selective herbicide that controls specific grasses, sedges and broadleaf weeds with residual activity. Contains sulfentrazone, the active ingredient in Spartan® 4F Herbicide brands.

Willowood Sulfen Cloran

Pre-emergent herbicide for broad spectrum control of weeds and grasses in soybeans only. Contains sulfentrazone and cloransulam-methyl, the active ingredients in Authority® First DF Herbicide.

Enlist One®

Pre-plant, pre-emergent and post-emergent herbicide for control of emerged annual and perennial broadleaf weeds in Enlist corn, soybeans and cotton. Enlist herbicides with Colex-D® technology are the ONLY 2,4-D containing products authorized and specifically labeled for use with Enlist crops.

Willowood Clethodim 2EC

Post-emergent herbicide for control of grasses in many labeled row and specialty crops. Contains clethodim, the active ingredient in Select® 2EC Herbicide.

Willowood Metribuzin 75DF

Broad spectrum herbicide for control of certain grasses and broadleaf weeds as a stand-alone or tank-mix partner with other herbicides to add an additional mode of action. Contains metribuzin, the active ingredient found in Sencor® Herbicide.

GCS S-Metolachlor 82.4% EC

Pre-plant, pre-emergent or post-emergent herbicide for control of small-seeded broadleaf weeds and grasses in labeled crops, such as corn, cotton and soybeans. Contains s-metolachlor, the active ingredient in Dual II Magnum® Herbicide.

Pendimethalin 3.80 Value Pick

Selective herbicide for control of certain broadleaf weeds and annual grasses. Contains pendimethalin, the active ingredient in Prowl® Herbicide.

Willowood Sulfen Met

Pre-plant and pre-emergent selective herbicide for control of broadleaf weeds, sedges and suppression of labeled grasses in soybeans and other labeled crops. Contains sulfentrazone and metribuzin, the active ingredients in Authority® MTZ Herbicide.

GCS 2,4-D LV 6 Ester

Pre- and post-emergent herbicide for control of many broadleaf weeds and brush control in corn, small grains, soybeans (preplant) and other labeled crops. Contains 2,4-D and 2-ethylhexyl ester, the active ingredients found in 2,4-D LV 6 Herbicide.

Willowood Paraquat 3SL¹

Defoliant and desiccant herbicide for the control of weeds and grasses and as a harvest aid. Contains paraquat, the active ingredient in Gramoxone® SL 3.0 Herbicide.

Sharpen® powered by Kixor® Herbicide

Contact burndown and rate-dependent residual pre-emergent broadleaf weed control in select field and row crops such as corn, cotton, forage grasses, rice, small grains, sorghum, soybean, fallow and postharvest croplands, pasture and other labeled crops.

Dicamba DMA 4 Value Pick

Pre- and post-emergent herbicide for weed control in corn, cotton, sorghum, soybean, small grains, pasture, hay, rangeland, farmstead (non-cropland), fallow and other labeled crops. Contains dicamba DMA, the active ingredient in Banvel® Herbicide.

FUNGICIDES

GCS AzoxyProp

Broad spectrum fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin and propiconazole, the active ingredients in Quilt Xcel® Fungicide.

GCS Azoxy 2 SC

Broad spectrum systemic fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin, the active ingredient in Aframe™ Fungicide.

Willowood Propicon 3.6EC

Broad spectrum fungicide formulated for the management of many plant diseases in labeled row and specialty crops. Contains propiconazole, the active ingredient in Tilt® Fungicide.

Thiophanate-methyl 4.50 Value Pick

Broad-spectrum fungicide for controlling diseases like powdery mildew, anthracnose, scab, rust, white mold and various rots.

Prothioconazole (4.0) Value Pick

A broad-spectrum fungicide for wheat, sugarbeet, peanut, cotton and other crops. Suppresses and controls Cercospora leaf spot, powdery mildew, head blight and other yield-limiting diseases. Contains the same active ingredient as Proline® 480 SC Fungicide.

Prothioconazole (1.46) + Trifloxystrobin (1.25) Value Pick

A dual mode of action fungicide offering broad-spectrum and residual disease control and plant health benefits for corn, soybeans, wheat and other crops. Suppresses and controls tar spot, rusts, white mold and more. Contains the same active ingredients as Delaro® 325 SC Fungicide.

INSECTICIDES

Willowood Lambda-Cy 1EC¹

Broad spectrum insecticide for use in many labeled row and specialty crops. Can be applied via ground or air. Restricted Use Pesticide. Contains lambda-cyhalothrin, the active ingredient in Silencer® Insecticide.

GCS Bifenthrin 2EC¹

Broad spectrum insecticide for control of insects and mites in many row and specialty crops, such as canola, corn, cotton, dried beans and peas, fruiting vegetables, grapes, head lettuce, peanuts, soybeans and other labeled crops. Contains bifenthrin, the active ingredient in Bifen 2EC Select™ Insecticide.

Willowood Imidacloprid 4SC

For uses in pest management, control of listed insects that may vector diseases and maintenance of plant health. Contains imidacloprid, the active ingredient in Admire® Pro Systemic Protectant.

ADJUVANTS

Sizzle®

Farmers First™ Sizzle® is an advanced oil-based water conditioner, activator, drift & deposition aid that provides faster observable results to ensure confidence in glyphosate performance at half the rate of competitive products, concentrates and high surfactant oil concentrates.

FieldGrip™ DRA

FieldGrip DRA is a high-concentrate emulsifiable deposition aid and drift management adjuvant.

Even™ 34L

Even 34L is a liquid ammonium sulfate (AMS) water conditioner designed to reduce the antagonism of spray water impurities that can interfere with the performance of glyphosate, glufosinate and other herbicides.

Formulated with potassium salt, which provides better rainfastness and improved performance under adverse conditions. It is also approved to be used in tank mixes with Enlist One®.

Fancy

Selective post-emergent control of annual and perennial broadleaf weeds and woody brush. Contains fluroxypyr.

Far Reach

Post-emergent herbicide for control of annual and perennial broadleaf weeds in barley and oats not under-seeded with a legume, corn, wheat, grasses grown for seed and other labeled crops. Contains clopyralid and fluroxypyr, the active ingredients in WideMatch® Herbicide.

Agri Star® Ozone 3.0

Post-emergent herbicide for the control of wild oat, green foxtail and other grass and broadleaf weeds in spring and winter wheat. Contains flurcarbazone-sodium.

Vasuvius™

For burndown and early season residual control and post-emergent control of wild oat, green foxtail and other listed grass and broadleaf weeds in spring and winter wheat.

Locksley™

Selective post-emergent herbicide for broadleaf weed control. Contains carfentrazone, the active ingredient in Aim® EC Herbicide.

Willowood Metribuzin 75DF

Broad spectrum herbicide for control of certain grasses and broadleaf weeds as a stand-alone or tank-mix partner with other herbicides to add an additional mode of action. Contains metribuzin, the active ingredient found in Sencor® 4 Flowable Herbicide.

GCS 2,4-D LV 6 Ester

Pre- and post-emergent herbicide for control of many broadleaf weeds and brush control in corn, small grains, soybeans (preplant) and other labeled crops. Contains 2,4-D and 2-ethylhexyl ester, the active ingredients found in 2,4-D LV 6 Herbicide.

Willowood Paraquat 3SL¹

Defoliant and desiccant herbicide for the control of weeds and grasses and as a harvest aid. Contains paraquat, the active ingredient in Gramoxone® SL 3.0 Herbicide.

Sharpen® powered by Kixor® Herbicide

Contact burndown and rate-dependent residual pre-emergent broadleaf weed control in select field and row crops such as corn, cotton, forage grasses, rice, small grains, sorghum, soybean, fallow and postharvest croplands, pasture and other labeled crops.

Dicamba DMA 4 Value Pick

Pre- and post-emergent herbicide for weed control in corn, cotton, sorghum, soybean, small grains, pasture, hay, rangeland, farmstead (non-cropland), fallow and other labeled crops. Contains dicamba DMA, the active ingredient in Banvel® Herbicide.

FUNGICIDES

GCS AzoxyProp

Broad spectrum fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin and propiconazole, the active ingredients in Quilt Xcel® Fungicide.

GCS Azoxy 2 SC

Broad spectrum systemic fungicide for management of many plant diseases in labeled row and specialty crops. Contains azoxystrobin, the active ingredient in Aframe™ Fungicide.

Willowood Propicon 3.6EC

Broad spectrum fungicide formulated for the management of many plant diseases in labeled row and specialty crops. Contains propiconazole, the active ingredient in Tilt® Fungicide.

Willowood Teb 3.6SC

Fungicide for the control of specified diseases in row and specialty crops such as barley, beans, corn, cotton, peanut, soybean, wheat and other labeled crops. Contains tebuconazole, the same active ingredient in Onset™ 3.6SL Fungicide.

Prothioconazole (4.0) Value Pick

A broad-spectrum fungicide for wheat, sugarbeet, peanut, cotton and other crops. Suppresses and controls Cercospora leaf spot, powdery mildew, head blight and other yield-limiting diseases. Contains the same active ingredient as Proline® 480 SC Fungicide.

Ellora

Broad-spectrum systemic fungicide for use on barley, corn (field corn, field corn grown for seed, popcorn, and sweet corn), peanut, and wheat.

INSECTICIDES

Willowood Lambda-Cy 1EC¹

Broad spectrum insecticide for use in many labeled row and specialty crops. Can be applied via ground or air. Restricted Use Pesticide. Contains lambda-cyhalothrin, the active ingredient in Silencer® Insecticide.

Zeta-Cypermethrin (0.80) Value Pick

Group 3A Insecticide for control of cutworm, armyworm, stalk borer and other labeled insects.

ADJUVANTS

Sizzle®

Farmers First™ Sizzle® is an advanced oil-based water conditioner, activator, drift & deposition aid that provides faster observable results to ensure confidence in glyphosate performance at half the rate of competitive products, concentrates and high surfactant oil concentrates.

FieldGrip™ DRA

FieldGrip DRA is a high-concentrate emulsifiable deposition aid and drift management adjuvant.

FieldGrip™ VRA

A VaporGrip® Xtra Agent may be used as an additional tool to reduce volatility potential when tank mixed with dicamba. Use of FieldGrip VRA does not replace an approved drift reduction adjuvant (DRA).

Even™ 34L

Even 34L is a liquid ammonium sulfate (AMS) water conditioner designed to reduce the antagonism of spray water impurities that can interfere with the performance of glyphosate, glufosinate and other herbicides.

Even™ DR

Even DR is a water soluble blend of reduced rate water conditioning and sequestering agents. FBN® SEED & SEED TREATMENTS

Maximize ROI with our curated selection of genetics and advanced treatments from partners like Seitec Genetics®, Green Cover, Direct Enterprises and Farmers First™.

CASH CROP SEED

83 Unique Varieties Across Multiple Trait Platforms

CORN SOYBEANS SORGHUM ALFALFA

Seitec Genetics collaborates with trait and treatment developers to deliver a comprehensive range of technology options tailored to specific farm environments.

SEED TREATMENT

9 Seed Treatments

Direct Enterprises provides handcrafted, custom-blend seed treatments and performance technologies tailored to grower needs.

Advanced Planter Box Treatment

Furrow Flex™ Soy utilizes patented Bio-Capsule Technology™ to deliver fungicide, insecticide, and nutrients directly at the planter.

COVER CROP SEED

Mixes and Blends

Green Cover is a leading national supplier of cover crops, serving over 10,000 customers. Their diverse seed mixes are designed to be planted between cash crops.

5 Unique Blends

Farmers First™ offers a diverse portfolio of cover crop seed mixes, partnering with leading suppliers to deliver high-quality genetics directly to the farm.

To learn more about our seed and seed treatment products, or to talk to an FBN representative, call **844-4-INPUTS** or visit **fbn.com** today.

LIVESTOCK PRODUCTS

FBN® offers a complete lineup of livestock health and nutrition products—from vaccines and dewormers to mineral tubs and supplies—backed by transparent pricing and fast, direct-to-farm delivery.

VACCINES

Bovi-Shield® Gold One Shot

Provides broad respiratory protection with *Mannheimia haemolytica* coverage to help reduce stress-related pneumonia in calves.

Bovilis® Vision®

Clostridial vaccine formulated for protection against blackleg and seven common clostridial diseases in cattle.

Triangle® 10 HB

Comprehensive respiratory and reproductive protection including IBR, BVD, BRSV, PI3, and

DEWORMERS

Safeguard® Suspension 10%

Broad-spectrum dewormer for cattle and goats containing fenbendazole for effective control of internal parasites.

Ivermectin Pour-On

Topical dewormer for control of internal and external parasites, including lice, grubs, and horn flies.

Dectomax® Injectable

Systemic endectocide for broad parasite control and extended activity against key internal and external species.

IMPLANTS

Component® E-C

Combination implant containing estradiol benzoate and progesterone to improve rate of gain in suckling beef calves.

Ralgro®

Implant promoting growth in beef cattle through increased feed efficiency and weight gain.

Synovex® Choice

Implant for improved performance in feedlot cattle. Combination of trenbolone acetate and estradiol benzoate.

SUPPLIES

Dura Products Transfer Pumps

Precision chemical transfer systems built for efficient, accurate handling of liquid crop and pasture protection products.

FBN® Prodigy Syringe

Reliable, easy-to-use syringe engineered for consistent dosing and durability during herd processing.

MINERAL

Prime Breeder

Essential oil blend for added health support that provides the highest bioavailability for maximum absorption and supports reproduction and peak performance.

Choice All-Purpose and Hi-Mag

Cost-effective mineral for everyday performance that supports productivity and herd health. Hi-Mag option helps prevent grass tetany.

Select Stock

Economical option for baseline nutrition that supports productivity and core requirements. Ideal for supplementing quality forage.

NUTRITION & TUBS

FBN® 30-12 Tub

High-protein, mineral-fortified tub designed to support performance during stress or limited forage availability.

Sweetlix® Stress and Weaning Tub

Nutrient-dense formula with vitamins, minerals, and electrolytes to help maintain intake and hydration during stress events.

Farmers First™ 35% Free Choice Grazer

35% protein, free-choice liquid supplement designed for cows, bred heifers, and stocker cattle on pasture, stalks, or other low-quality forages.

CONTROLLING WORKPLACE HAZARDS

There are risks included with using herbicides and other chemicals. Applicators should always read the label which provides information on the proper application methods and other safety details.

Controlling exposures to chemical hazards and toxic substances is the fundamental method of protecting workers. A hierarchy of controls is used as a means of determining how to implement feasible and effective controls.

Engineering and work practice controls must be the primary way to reduce employee exposure to toxic chemicals. Respiratory protection is required to be used when engineering or work practice controls are infeasible or while they are being implemented.

 To learn more about our crop protection products, or to talk to an FBN representative, call **844-4-INPUTS** or visit **fbn.com** today.

TYPE OF CONTROL	EXAMPLES
Elimination/Substitution	Substitute with safer alternatives through a work plan, like the 7-Step Work Plan: <ol style="list-style-type: none">1. Identify chemical2. Set a reduction goal3. Track achievements by date4. List action steps5. Develop timeline6. Set metrics7. Identify assessment tool used
Engineering Controls Implement physical change to the workplace which eliminates/reduces the hazard on the job/task	<ul style="list-style-type: none">• Change process to minimize contact with hazardous chemicals• Isolate or enclose the process• Use of wet methods to reduce generation of dusts or other particulates• General dilution ventilation
Administrative and Work Practice Controls Establish efficient processes or procedures	<ul style="list-style-type: none">• Rotate job assignments.• Adjust work schedules so that workers are not overexposed to a hazardous chemical.
Personal Protective Equipment Use protection to reduce exposure to risk factors	<ul style="list-style-type: none">• Use chemical protective clothing• Wear respiratory protection• Use gloves• Wear eye protection

Where possible, elimination or substitution is the most desirable followed by engineering controls. Administrative or work practice controls may be appropriate in some cases where engineering controls cannot be implemented or when different procedures are needed after implementation of the new engineering controls. Personal protection equipment is the least desirable but may still be effective.

MIXING ORDER MATTERS

For herbicide applications mixed with water, remember the WAMLEGS acronym regarding mixing order. Begin by filling the spray tank with about half of the water required for the total spray job, and begin agitation.

W	Wettable powders, flowables
A	Agitate, anti-foaming, buffering agents
M	Microcapsule suspension
L	Liquids and solubles
E	Emulsifiable concentrate
G	Glyphosate
S	Surfactant

Finally, add water to the required levels and continue agitation so that the tank mix is ready for spraying. **Always remember to read and follow label instructions.**

FARM NOTES

To learn more about our crop protection products, or to talk to an *FBN* representative, call **844-4-INPUTS** or visit **fbn.com** today.

¹RESTRICTED USE PESTICIDE Due to acute toxicity. For retail sale to and use by certified applicators only –NOT to be used by uncertified persons working under the supervision of a certified applicator.

Terms and conditions apply. Input financing provided in connection with our financing partners. To qualify for a financing offer, a borrower must be a member of Farmer's Business Network, Inc. and meet the underwriting requirements of FBN Inputs, LLC and its lending partners. All credit is subject to approval and underwriting. Interest rates and fees will vary depending on your individual situation. Not all applicants will qualify.

For purchases using FBN® Inputs input financing, qualified farmers must purchase within promotional period (September 13 - August 31, 2025) to receive the promotional rate: 2.99%. Qualified farmers have the opportunity to rate lock at 0% when they spend a minimum of \$20,000 on all FBN® inputs, seed or livestock products during the promotional period (September 13 - December 31, 2025) and include at least 4 unique products with a minimum of \$1,000 each. Reaching these requirements allows qualified farmers to lock in 0% interest financing through September 30, 2026 on FBN® products purchased through August 31, 2026. Payment in full must be made by January 1, 2026; default interest rate charges apply. After September 30, 2026 the interest rate will be subject to the prime rate as reported in the Wall Street Journal plus 2.50%. On the first day of each month the interest rate shall be adjusted by adding a margin of 2.50% to the current prime rate.

Payments for all amounts owed under the associated FBN® Input Financing are due January 1, 2026. If the total balance for all amounts owed is not paid in full by January 10, 2026, late fees will be imposed.

Products sold or distributed through *FBN* are offered by *FBN* Inputs, LLC and are available only in states where *FBN* Inputs, LLC is licensed and where those products are registered for sale or use, if applicable. Please check with your local extension service to ensure registration status. Terms and conditions apply.
