2024 SILAGE GUIDE

There are plenty of metrics to consider when choosing a good Silage hybrid. Below is a list of key dual-purpose silage products and how they stack up vs. the competition when it comes to Yield Tons Per Acre, Milk Per Ton and NDFD 24.

| Product | RELATIVE MATURITY | TONS/A % CHECKS | MILK PER TON % CHECKS | NDFD24 % CHECKS |
|-----------|-------------------|-----------------|-----------------------|-----------------|
| F2F1C-890 | 89 | 117% | 97% | 98% |
| F2F1C-928 | 92 | 102% | 94% | 97% |
| F2F1C-941 | 94 | 105% | 98% | 96% |
| F2F1C-120 | 112 | 92% | 98% | 103% |
| F2F1C-121 | 112 | 86% | 102% | 101% |
| F2F1C-131 | 113 | 94% | 104% | 99% |
| F2F1C-139 | 113 | 105% | 99% | 94% |

FEED YOUR ROI

In a recent trial, the producer made **\$23,090** more from *FBN Profectus™* fed calves compared to the control, realizing **\$127.82**** per head.

Profectus™ Feeds Supplement Options

STARTER

For calves weighing 200-600 lbs, encourage healthy growth, immune support and overall vitality.

DEVELOPER

For bulls and heifers, optimize genetic expression from post-weaning up to two years of age.

GROWER

With young cattle, encourage lean weight gain while transitioning from weaning to finish.

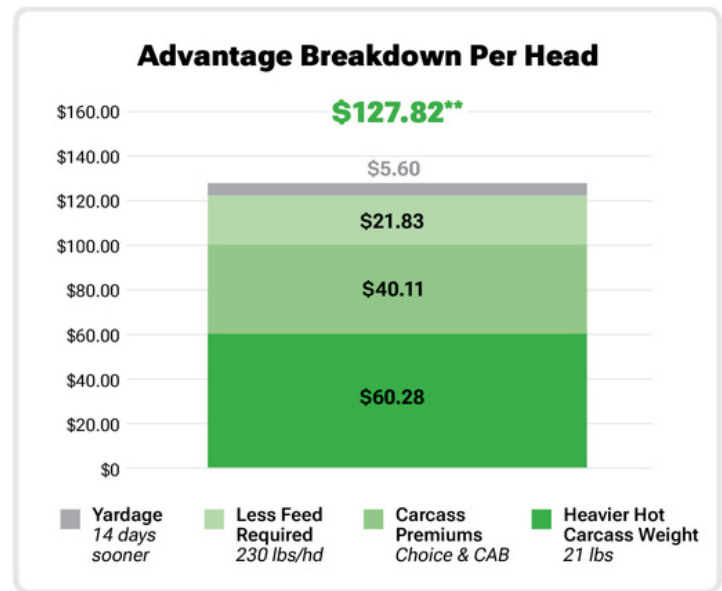

FINISHER

In the final stages of cattle growth, optimize the quality and yield of your beef.

GROW-FIN

An all-in-one product for feed efficiency and balanced nutrition from weaning to harvest.

***Differences in mortality rate are not reflected in this number.*

FORAGE INOCULANT

FBN® Forage Inoculant All-Purpose 500 is a water soluble inoculant with three different strains of lactic acid-producing bacteria to aid fermentation and improve nutrient preservation when applied to all types of high moisture forages. Forage Inoculant All-Purpose 500 provides 150,000 CFU's of live naturally occurring lactic acid producing bacteria per gram of forage.

BENEFITS:

- Promotes rapid production of lactic acid for a fast, efficient fermentation, preserving energy.
- Improves forage quality by reducing protein degradation & ammonia levels during fermentation.
- Expedites pH decline of forage to stabilize the feed.
- Reduces dry matter and nutrient loss, leading to increased animal performance.
- Excellent mixing and re-suspension characteristics.

FEATURES:

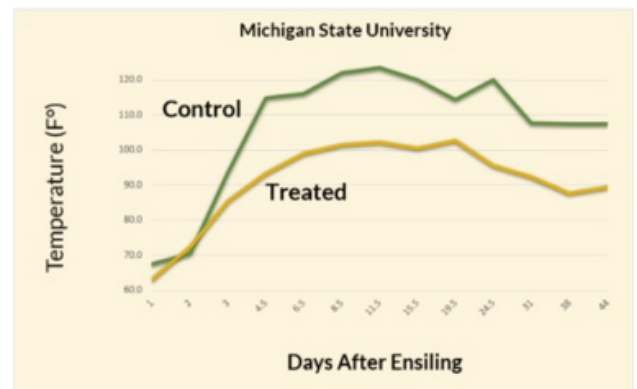

- Bacteria stabilizers to assure bacteria are healthy and viable at the time of application.
- Contains multiple strains of bacteria proven to be effective throughout all stages of fermentation.
- Water-soluble form for ease of application.
- Formulated, blended, & packaged in our certified facility to ensure viability and effectiveness.
- Non-corrosive and non-toxic.
